(E) = extinct; (e) = formerly present but now extirpated in Louisiana; (Q) = status in question/pending further LBRC review.

H = Hypothetical, accepted sight record lacking hard evidence (LBRC requires specimen/photo for acceptance of First State Record)

The LBRC requests documentation for records of the following recognizable subspecies or forms (*in italics*): "Great White" Heron, Northern "Red-shafted" Flicker, Yellow-rumped "Audubon's" Warbler, and "Gray-headed" Junco. "Great White" Heron was previously listed on review/State lists however, this subspecies is not currently accepted. Status of Northern "Red-shafted" Flicker is currently under re-evaluation (indicated by Q).

(Over)

The LBRC also requests documentation for records of any species not currently accepted on the State List. This includes species of captive/introduced origin not currently recognized on the State List. Notable examples include Black Francolin, Ring-necked Pheasant,

and Monk Parakeet. To properly evaluate whether species have become established, it is necessary to receive reports, especially those pertaining to breeding and population status.

The Committee also welcomes submission of documentation for records of former Review List species from prior to the species' removal from the list.
