

LBRC Report Form

1. English and Scientific names: Green-breasted Mango (*Antracothorax prevostii*)ii
2. Number of individuals, sexes, ages, general plumage (e.g., 2 in alternate plumage):
One female
3. Parish:
Terrebonne
4. Specific Locality:
105 St. George Circle Schriever, LA. 70395
5. Date(s) when observed: December 5, 6, 7, 2023
6. Time(s) of day when observed: 12/5 first observed 12:30 -4:30 , 12/6 observed about 10.45-12:00, 12/7 observed about 12:00-1:00
7. Reporting observer: Diana Metrejean Coupel Bailly
8. Other observers accompanying reporter who also identified the bird(s):
Kathy Rhodes, Darlene Eschete, Jack Rogers, Dr. Van Remsen, others
9. Other observers who independently identified the bird(s):
Nick Ramsey, Delaina LeBlanc, Joan Garvey, and many others
10. Light conditions (position of bird in relation to shade and to direction and amount of light): Clear and fair
11. Optical equipment (type, power, condition): Canon Power Shot SX70 HS
12. Distance to bird(s): Estimate: 20-30-feet when at feeder and further on top of tree
13. Duration of observation: Day 1 - 4 hours, day 2 - 1 hour and 15 minutes, day 3 - 1 hour
14. Habitat: 4 feeders, bottlebrush hedge with some flowers, crepe myrtle trees, residential with wooded area near by. Manicured lawn.
15. Behavior of bird / circumstances of observation (flying, feeding, resting; include and stress habits used in identification; relate events surrounding observation): Shy and nervous due to small hummers chasing her away from feeders. Other hummers were territorial.

16. Description (include only what was actually seen, not what "should" have been seen; include if possible: total length/relative size compared to other familiar species, body bulk, shape, proportions, bill, eye, leg, and plumage characteristics. Stress features that separate it from similar species):

Very large compared to others hummers present. Distinctive decurved bill. Striking vertical down center of throat and chest. Extremely long tail Rufous colored with white edging.

17. Voice: Did not hear a voice

18. Similar species (include how they were eliminated by your observation):

Buffed Bellied in my experience but Mango had black bill and beefier

19. Photographs or tape recordings obtained? (by whom? attached?):

Myself

20. Previous experience with this species: None

21. Identification aids: (list books, illustrations, other birders, etc. used in identification):

Sent photos to Kathy Rhodes to help identify and Nancy Newfield and Dr. Erik Johnson who confirmed the id

22. Identification aids used when?

None used

23. Are you positive of your identification? If not, explain:

yes

24. Date report completed:

12-11-2023

25. May the LBRC have permission to display in whole or in part this report and accompanying photos on the LOS-LBRC website and LBRC Facebook page?

Yes

26. If yes, may we include your name with the report?

Yes
